BUBBLE HANGERS

VAULOT & DYÈVRE

EDITION 2013

Description :

Hand blown in a mould, the Bubble hangers come in two sizes and set up in the same manner as soap bubbles, in unpredictable forms. The result rejuvenates the home by adding colourful yet transparent touches. The designers have created a strong hanger with one point of anchorage, providing the illusion of fragility whilst assuring solidity.

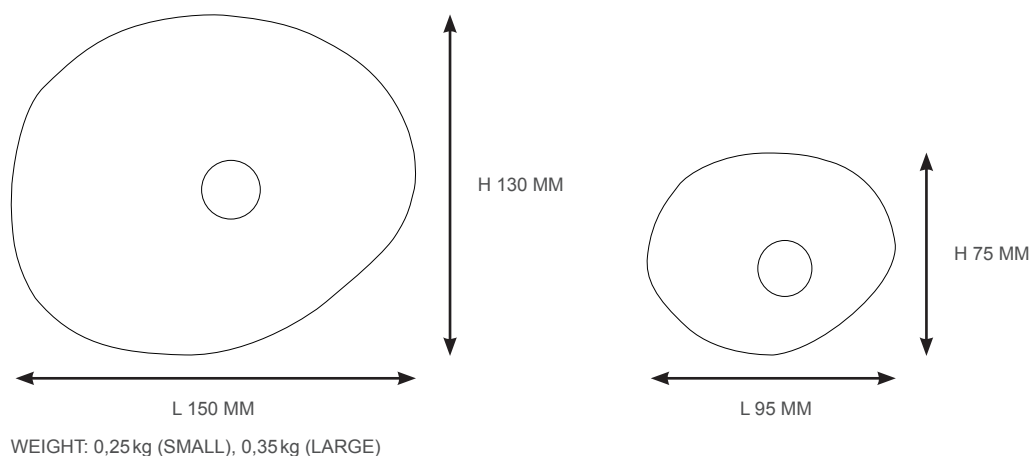

Bubble according to its designers...

« The Bubbles hangers are like soap bubbles frozen forever. The stained glass aids this transformation by bringing a whimsical dimension to the object. The only anchor is in contact with the wall where a solid fixing allows the hook to be hung simply ». Vaultot & Dyèvre

The designers in a few words...

Vaultot & Dyèvre (Quentin Vaultot, born in 1983 and Goliath Dyèvre, born in 1980) have been associates since 2009. Both graduated from ENSCI/Les Ateliers. After a collaboration with the architect Philippe Rahm for the VIA carte blanche in 2008, they won help in 2010 from the VIA with a large scale lamp of 3.5m called Spanlight. The project « Fantôme », bells concealing objects won them the second prize in the Cinna competition in the small furniture category. Working in scenography they created "Objets du numérique" for the Lieu du Design. In 2012 they won first prize for design at Agora Bordeaux and started a research project with CRAFT (Centre de Recherche sur les Arts du Feu et de la Terre) in Limoges as well as directing several scenography projects including one for The Centre of National Monuments. They live and work in Paris.
