

PRODUCT FACT SHEET

ADAPTABLE TABLE FURNITURE / LIGHTING / ACCESSORIES

TAF Architects on the design "Our idea was to update the classic Scandinavian wood table. The result has obvious references to traditional Scandinavian furniture making, but choice of materials and detailing give it a new expression. Furthermore, we wanted to make the table adaptable to personal needs - with a choice of 2 different table tops, 3 frames and 3 types of legs. There are 18 ways to create a personal and unique table."

PROCESS

The table top board is cut out and a list in solid wood is glued on to the edges all the way around it. Veneer is glued on top and bottom all the way out to the edge. The surface gets grinded and treated with white oil for the natural oak look, and painted for the coloured table tops. The steel frame is laser cut, bended and painted with powder coating. The legs are lathe grinded and the surfaces treated with oil or paint.

DESIGNED BY / YEAR OF DESIGN

TAF Architects / 2009

TYPE

Multi functional table

Customized sizes for projects available upon request.

ENVIRONMENT

Indoor

MODULE DIMENSIONS (CM)

Length: 200
Width: 90
Leg height: 63
Total height: 73
Length between legs: 185
Width between legs: 78

MATERIAL

Oak / Ash / Steel frame

COLOUR / REFERENCE CODE

Oak: legs and top
Grey: legs and frame
Black: legs, top and frame
White: frame

CLEANING INSTRUCTIONS

Clean table often and carefully with a soft dry cloth following the grain pattern. Periodically clean with moist cloth along the wood grains. Dry immediately with soft and dry cloth following wood grains. The wood should not be subjected to excessive humidity, heat or direct sunlight. Use of wax, oil, etc. is dependent on the finish type and is done at own risk.

ABOUT THE DESIGNER

TAF Architects is a Stockholm-based design and architecture studio making International headlines within product and interior design.
